EDUCATION

Bachelor of Engineering — Computer Engineering

2022 – 2026

Sir Syed University of Engineering & Technology (SSUET) | Karachi, Pakistan

Final Year Project: CyberGuard AI — Hybrid ML ensemble (Random Forest, LSTM, Isolation Forest, NLP Transformers) for real-time cybersecurity threat detection achieving 93% accuracy.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python, PHP, HTML/CSS, React.js, Node.js, Express.js, MERN Stack

AI / ML: Machine Learning, Deep Learning, NLP, RAG (Retrieval-Augmented Generation), Transformers, LSTM, Random Forest, Isolation Forest

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Vercel, REST APIs

Other: UI/UX Design, SEO, Digital Marketing, AI Integration

PROJECTS

CyberGuard AI — Final Year Project — *Python · Scikit-learn · TensorFlow · NLP Transformers* [GitHub →](#)

- Hybrid ML ensemble combining Random Forest, LSTM, Isolation Forest, and NLP Transformers for multi-vector threat detection.
- Achieved 93% detection accuracy across network intrusion, malware, and anomaly use cases.
- Real-time alerting pipeline with automated threat classification and incident scoring.

Bank Statement Analyzer — *Python · NLP · Data Analysis · React*

- AI-powered tool that parses and categorizes bank transactions from raw statement PDFs.
- Provides automated financial summaries, spending patterns, and anomaly detection for SMB clients.

AI-Powered CRM — *MERN Stack · AI Integration · REST API*

- SaaS CRM platform targeting Pakistani SMBs, with AI-driven lead scoring, follow-up automation, and customer insights.
- Built full-stack with React frontend, Node/Express backend, and MongoDB.

E-Commerce Application — *JavaScript · React · Node.js* [GitHub →](#)

- Full-stack e-commerce platform with product listing, cart management, and checkout flow.

Crime Reporting Website — *PHP · MySQL · JavaScript* [GitHub →](#)

- Web platform for citizens to file and track crime reports, with admin dashboard and case management.
- Built with PHP backend, MySQL database, and responsive HTML/CSS/JS frontend.

Cricket Analysis Dashboard — *Python · Data Analysis · Visualization* [GitHub →](#)

- Data analytics dashboard for cricket match statistics with visual charts and player performance comparisons.

Bank Data Analysis — *Python · Pandas · Visualization* [GitHub →](#)

- Exploratory data analysis of banking datasets — customer segmentation, churn indicators, and trend reporting.

ML Internship Tasks — *Python · Scikit-learn · ML Pipelines* [GitHub →](#)

- Completed a range of supervised and unsupervised ML tasks during internship at Elevvo.Tech.

EXPERIENCE

Founder & Lead Developer | [Orvion Digital Agency \(theorvion.io\)](https://theorvion.io) 2024 – Present

- Built and operate a full-service digital agency offering web development, AI integration, UI/UX, SEO, and digital marketing.
- Primary focus on e-commerce brands; delivered multiple client projects spanning React SPAs, CMS integrations, and performance-optimized storefronts.
- Managed Google Search Console indexing and technical SEO for client sites deployed on Vercel.

Machine Learning Intern | [Elevo.Tech](https://elevo.tech) 2024

- Completed hands-on ML tasks covering supervised learning, model evaluation, and data preprocessing pipelines.
- Delivered repository of completed internship tasks demonstrating applied ML skills.
